Recent graduate of BSc.(Hons.) Games Design & Development with a keen interest in web and game development. Good knowledge of HTML5, CSS3, Javascript, Git, Linux, PHP and MySQL. Successfully launched two games on the Google Play store.

Experience

May 2016 - September 2016 | Johnny Walsh Floor Coverings | Full-Stack Web Developer

- Developed a company website to promote the company brand on the web.
- Developed technical and soft Skills (JavaScript, PHP, XAMPP, HTML5 and CSS3).
- Dealing with the Client with weekly meetings and communication between the web hosting service.

Education

Limerick Institution of Technology | 2012 – 2017 | B.Sc. (Hons.) in Games Design & Development | 2.1

Successfully completed a B.Sc. (Hons). In Games Design & Development achieving a Second-Class honours degree. The course had a focus on Games Design and Development which allowed me to follow my passion in this area whilst also building technical projects highly relevant in commercial and enterprise applications. This course allowed me to significantly develop my technical skills whilst also improving my teamwork and leadership skills through many team based projects.

PROJECTS

- Real-time Weather Application: developed a Real Time Weather system application in Cocos2d-x(C++) and Unity3D(C#), using Json data parsed from Wunderground Api.
- Weather Alert: Currently developing a real time web application. Meteoalarm Api is used to get Current weather warnings using Google's Location service. The App uses push notifications to phone. Technology used React-Native, Git, HTML5 and CSS3.

- Personal website : developed a responsive website to show my project work and personal blog. The website was developed using HTML, CSS, and Jekyll.

Relevant subjects include:

Web development, Cross-platform Application development, Network Programming, Enterprise Application Development, Systems Analysis and Design, Database Systems, Software Security and Testing.

2007 – 2012 | St. Mary’s Secondary School, Newport | Leaving Certificate

Skills and Certification

- Knowledge of LAMP, XAMPP.
 - Experienced with Google Analytics.
 - Knowledge of HTML, CSS, React, Angular and Javascript.
 - Completed two Lynda courses in Git and Project Management.
 - Excellent communication and presentation skills developed through major work and college based projects.
 - A large amount of team based project work in my employment together with college projects.
-
